\*\*Class Meets 4:30-5:30pm

Questions? Comments? Ideas? [info@RyeAfterSchool.com](mailto:info@RyeAfterSchool.com) or 888.212.3837

<b>3D Design in TinkerCad</b>	Make your own designs and drawings 3D using the user friendly modeling software, TinkerCAD. With a few simple clicks, watch your images become three-dimensional by adding lines, shapes, color, textures details and design to your very own models.
<b>Advanced Chess</b>	Advanced Chess is for those who have played Chess before and have prior knowledge of the rules. Learn advanced strategies and tactics to help win more games. All players will learn about the etiquette and strategy of a game that is truly a great lifetime activity for young and old alike.
<b>Amazing Artists</b>	Capture your world like an impressionist, abstract and pop art master! Learn about famous artists and be inspired to create your own original works of art. Using different mediums and techniques, try different styles and be your own Amazing Artist.
<b>Animal Trivia, Challenges and Mysteries</b>	Join us for an all-new way of exploring animals! Each week we'll challenge ourselves as we learn about our favorite animals through trivia games, who-done-it mysteries, artifact challenges, and more! We'll try our hand at poison and venom jeopardy, a wildlife detective challenge, name that animal trivia, and more! We'll meet some live animals and have a new game each week!
<b>Beginning Chess</b>	Beginning Chess is for students who have never played the game or have only played a few times. Learn the fundamentals of chess, including the basic moves of pieces, their value, interaction and how to win. All players will learn about the etiquette and strategy of a game that is truly a great lifetime activity for young and old alike. Students will need to join LIChess.org before the first class, further instructions and a link are on the online description.
<b>Crazy Chemistry</b>	Grab your goggles and lab coat for this exciting, hands on chemistry class. Learn about chemical mixtures, atoms, acids, molecules, electrons, metals and more! Think like a chemist to explore how food is made, how some well-known items are produced and how purification works. You'll be amazed as you perform your very own (safe) experiments.
<b>Descendants Dance Party</b>	Learn beginner hip hop moves as you move just like your favorite character in the Descendants. Dance along to the soundtrack of the films as you learn routines and create your own.
<b>Game Design with Scratch</b>	Dive right into programming using the programming language Scratch where you will create animations, develop stories, and solve problems. The computer science concepts learned in this class can be used for many coding projects kids are likely to encounter in future endeavors.
<b>LEGO at Home: STEM FUNDamentals</b>	Connect with friends and classmates online, tap into your imagination and expand your building skills with simple pieces from your own LEGO® collection. Learn new building techniques and how your creations relate to real-world STEM concepts. Students are encouraged to create open-ended builds that can be added to during and out of class time to share with classmates virtually - a bonus to being at home!
<b>Magical Mondays</b>	Get ready to have some fun! Each week join classmates in a new virtually playful and social activity - craft activities, home scavenger hunts, show and tell, online board games, joke telling, story time, Kids Choice and More! Who knows what is in store for you here - show up and see!
<b>Math Facts Frenzy</b>	Math facts getting you down? Need help with math facts before you go on to the next grade? Work in groups to play games, learn mnemonics and other tricks to make learning math facts a snap. Increase confidence AND math scores!
<b>Ninja Boot Camp</b>	Gain the confidence and strength of a ninja in this unique movement class that combines martial arts, yoga and interval training. Get up and move, work on balance, flexibility and body awareness and have a blast while beating the winter blues. Drills, fitness challenge and bodyweight exercises will lead to a stronger and more confident YOU!
<b>Pottery Painting</b>	MADE Art Studio comes to you! Each week, paint a new piece of pottery. Learn different painting techniques as you create usable art. Pieces will be delivered home and will be returned to MADE for firing.
<b>Sports Management</b>	For the sports lover, future general manager or team owner or ESPN analyst...view the world of sports from a business perspective. Discuss and analyze a different "sports money" topic each week, including the value of sports teams, athlete compensation, college sports, endorsement, agents, the Super Bowl and so much more!
